Brand Logo

Primary logo

Our main logo is the cornerstone of our brand identity, representing the essence of who we are. Carefully crafted with precision and purpose, it embodies the values that define us. The distinctive design and harmonious color palette make our main logo instantly recognizable, symbolizing the strength and uniqueness that sets us apart in the market.

Logo on dark bg

The primary logo on a dark background should be used in a color variant that ensures visibility and contrast, maintaining the logo's clarity and impact

Color version

Our logo seamlessly integrates with different color environments. The logo maintains its clarity and impact, ensuring a strong and consistent brand presence across diverse contexts.

B/W variation

This variation typically features the logo in a simplified, monochromatic format, using only black and white colors. A black and white logo variation refers to a version of the logo that is designed to be used in situations where color printing is not available or appropriate.

Logo mark

A logo mark is a graphic symbol or icon that represents a brand, often used independently for quick and effective brand recognition.

Mark on dark bg

The logo mark on a dark background should be presented in a lighter color variant to ensure it remains visible and clear.

Color version

Mark color variations are different color versions of a logo mark, ensuring it remains effective and recognizable across various backgrounds and applications.

B/W variation

Mark B/W variation is a black and white version of a logo mark, ensuring it remains clear and recognizable without color.

App icons

An app icon is a small, graphical symbol used to represent a mobile application on a device's home screen or app menu. It serves as a visual identifier for the app and is designed to be easily recognizable and memorable to users.

Usage Guidelines

Exclusion zone

To maintain the logo's visibility and premium impact, a mandatory clear space (Exclusion Zone) must be maintained around it at all times. No other text, graphics, or imagery should encroach upon this area to ensure a clean and professional look.

Optimal size

To ensure the logo remains perfectly legible and sharp across all mediums, it must never be scaled down below its minimum size.

250 pixels

150 pixels

100 pixels

Co-branding

When the logo is displayed alongside a partner brand, it must be separated by a vertical dividing line to ensure both identities remain distinct. Both logos must be visually balanced in optical size and scale, maintaining the standard exclusion zone between them. Neither logo should appear dominant or crowded.

Brand Colors
